Biomimetics in Architecture Petra Gruber, 2011-02-24 The purpose of investigating the overlaps between architecture and biology is neither to draw borders or make further distinctions nor to declare architecture alive, but to clarify what is currently happening in the blurred fields, and to investigate the emerging discipline of „biomimetics in architecture [Architekturbionik]. An overview of the present state of research in the relatively young scientific field of biomimetics shows the potential of the approach. The new discipline aims at innovation by making use of the subtle systems and solutions in nature having evolved within millions of years. Approaches that have been taken to transfer nature's principles to architecture have provided successful developments. The new approach presented in this book transfers the abstract concept of life onto built environment. Strategic search for life's criteria in architecture delivers a new view of architectural achievements and makes the innovative potential visible, which has not been exploited yet. A selection of case studies illustrates the diversity of starting points: from vernacular architecture to space exploration.

Gay and Lesbian Aging Gilbert Herdt, PhD, Brian De Vries, PhD, 2003-11-17 The year 2003 marks the 30th anniversary of the landmark declassification of homosexuality as a disease by the American Psychiatric Association--a watershed in the lives of gays and lesbians in the United States. For the first time in history, a generation of self-identified lesbians, gay men, bisexuals, and transgender individuals are approaching retirement. This volume brings to the forefront important issues concerning the health, mental health, and concomitant special social service needs of this population and emphasizes the need for more research on aging sexual minorities. Based on empirical and qualitative research methods, chapters focus on the myriad issues of aging for lesbians and gay men including: Social and Cultural Considerations about HIV Among Midlife and Older Gay Men Psychological Well-Being in Midlife Older Gay Men Well-Being Among Middle-Aged and Older Single Gay Men Lesbian Friendships at and Beyond Midlife Contributors include Judith Barker, Jacqueline Weinstock, Bertram Cohler, and Doug Kimmel, among others.

Biomimicry in Architecture Michael Pawlyn, 2019-08-12 When searching for genuinely sustainable building design and technology - designs that go beyond conventional sustainability to be truly restorative - we often find that nature got there first. Over 3.5 billion years of natural history have evolved innumerable examples of forms, systems, and processes that can be applied to modern green design. For architects, urban designers and product designers, this new edition of Biomimicry in

Architecture looks to the natural world to achieve radical increases in resource efficiency. Packed with case studies predicting future trends, this edition also contains updated and expanded chapters on structures, materials, waste, water, thermal control and energy, as well as an all-new chapter on light. An amazing sourcebook of extraordinary design solutions, Biomimicry in Architecture is a must-read for anyone preparing for the challenges of building a sustainable and restorative future.

Noncolorectal, Nonneuroendocrine Liver Metastases Isidoro Di Carlo, 2014-11-25 This book offers a complete overview on non colorectal non neuroendocrine (NCRNNE) liver metastases and describes in detail the currently available therapies. Each chapter focuses on the treatment of metastases from a particular primary malignancy and also provides valuable information on incidence, natural history and diagnosis. NCRNNE liver metastases are rare entities compared with colorectal and neuroendocrine metastases, for which the treatments are well codified. While more publications have appeared on the topic in recent years, an in-depth study has to date been lacking. Furthermore, most published series are insufficiently comparable as they comprise patients with NCRNNE hepatic metastases from a variety of primary malignancies and consequently overlook differences in tumor behavior, frequency of isolated hepatic metastases, response to neoadjuvant or adjuvant therapy and interval between diagnosis of the primary tumor and the liver metastases. This book, with its more specific approach, will serve not only as an up-to-date guide to diagnosis and treatment but also as a reference on which to base future studies.

The Variscan Orogeny K. Schulmann, J.R. Martínez Catalán, J.M. Lardeaux, V. Janousek, G. Oggiano, 2014-07-28 This volume summarizes the state of the art of Variscan geology from Iberia to the Bohemian Massif. The European Variscan belt consists of two orogens: the older, northern and the younger, southern. The northern Variscan realm was dominated by Late Devonian–Carboniferous rifting, subduction and collisional events as defined by sedimentary records, crustal growth, recycling of continental crust and large-scale deformations. In contrast, the southern European crust was reworked by major Late Carboniferous collision followed by Permian wrenching. The Late Carboniferous–Permian orogeny overprinted the previously accreted system in the north, but with much lower intensity, resulting in magmatic recycling and extensional tectonics. These two main orogenic cycles do not reflect episodic evolution of a single orogenic system but a complete change in orientation of stress field, thermal regime, degree of reworking and recycling of European crust, reflecting a major switch in plate configurations at the Early–Late Carboniferous boundary.

Regression with Dummy Variables Melissa A. Hardy, 1993-02-25 It is often necessary for social scientists to study differences in groups, such as gender or race differences in attitudes, buying behavior, or socioeconomic characteristics. When the researcher seeks to estimate group differences through the use of independent variables that are qualitative, dummy variables allow the researcher to represent information about group membership in quantitative terms without

imposing unrealistic measurement assumptions on the categorical variables. Beginning with the simplest model, Hardy probes the use of dummy variable regression in increasingly complex specifications, exploring issues such as: interaction, heteroscedasticity, multiple comparisons and significance testing, the use of effects or contrast coding, testing for curvilinearity, and estimating a piecewise linear regression.

Biomimetics for Architecture Jan Knippers,Ulrich Schmid,Thomas Speck,2019-06-17 Nature has always been a source of inspiration for the design of the human environment. The analysis of biological constructions can not only lead to astonishing technical solutions but can also inspire the design of architecture. Bionics is a fascinating border area between pure research and practical application: biologists, chemists, physicists, mineralogists, and paleontologists meet up with material scientists, engineers, and architects and transfer their knowledge to architecture and construction. Using numerous practical examples, this richly illustrated introduction traces the process from the understanding of how something functions, to abstraction—for example in computer models—and the construction of initial prototypes, through to fully functional manufacture and production.

Digital Marketplaces Unleashed Claudia Linnhoff-Popien,Ralf Schneider,Michael Zaddach,2017-09-14 This collection of different views on how digitalization is influencing various industrial sectors addresses essential topics like big data and analytics, fintech and insuretech, cloud and mobility technologies, disruption and entrepreneurship. The technological advances of the 21st century have been massively impacted by the digital upheaval: there is no future without digitalization. The sale of products and services has left the classical point of sale and now takes place on a variety of channels. Whether in the automotive industry, travel and traffic, in cities, or the financial industry - newly designed ecosystems are being created everywhere; data is being generated and analyzed in real time; and companies are competing for mobile access channels to customers in order to gain knowledge about their individual contexts and preferences. In turn, customers can now publicly share their opinions, experiences and knowledge as User Generated Content, allowing them to impact the market and empowering them to build or destroy trust.

Linking Literacies Diane Dewhurst Belcher,Alan Hirvela,2001 *Linking Literacies* provides the most up to date theoretical overview of the connection between reading and writing in second language acquisition. Belcher and Hirvela have brought together the definitive collection of developments in reading-writing relations research and pedagogy. Papers are organized into these parts: Ground Practice: Theory, Research, and History In the Classroom: Teaching Reading as Writing and Writing as Reading (E)Merging Literacies and the Challenge of Textual Ownership Technology-Assisted Reading and Writing. In addition to examining the ways in which L1 influences have affected the development of L2 reading-writing theory and pedagogy, *Linking Literacies* looks at how L2 reading-writing scholarship has created an identity separate of an L1 framework. *Linking Literacies* examines a broad range of questions and concerns within the structure of L2 reading-writing

connections and L2 academic literacy through discussions of theory, research, and

The Outsourcing Revolution Michael F. Corbett, 2004-09-01 Business process outsourcing (BPO) is a \$6 trillion global industry involving thousands of companies and millions of employees. Business process outsourcing (BPO) is one of the very few business tools available to managers with the power to fundamentally transform their organizations. Done on a global scale, BPO enables companies to simultaneously reengineer their existing operations, create a more flexible and adaptable organizational structure, and tap the best minds in the world to create an innovation explosion. For the first time ever, BPO's best-known expert and pioneer, Michael Corbett, who helped craft IBM's entry into the outsourcing business, details the opportunities presented by BPO as well as a plan for implementing and sustaining its benefits. The Outsourcing Revolution is written for executives and managers in organizations of any size who want to learn how BPO can improve their company's performance. More than a how-to book, it provides a comprehensive framework for decision making and action based on the real-life experiences of executives heading up successful initiatives for their companies today. Readers will learn how to: * Determine the value of BPO for any process. * Analyze risk, evaluate its potential impact, and use a range of techniques to reduce, eliminate, and manage that risk. * Identify, evaluate, and select the right partner or partners. * Turn contractor relationships into long-term, successful BPO relationships. * Transition people, processes, and technologies to the BPO state. * Identify, develop, and reward outsourcing managers. * Create new ways of doing business ahead of the competition. The Outsourcing Revolution features case studies detailing how specific companies planned, implemented, and are managing BPO. Results from surveys of more than 1,500 companies provide real data on what organizations around the world are doing and why, as well as what does and doesn't work.

Veterinary Pharmacovigilance Kevin Woodward, 2009-11-24 Veterinary Pharmacovigilance: Adverse Reactions to Veterinary Medicinal Products is an in-depth examination of veterinary pharmacovigilance, looking at the scientific methodologies involved, the role of regulatory agencies and legislation, and the underpinning science. Edited by a renowned expert with over 20 years of experience in the field, it draws together the expertise of authors from around the world.

Cloud Computing and Services Science Donald Ferguson, Claus Pahl, Markus Helfert, 2021-03-22 This book constitutes extended, revised and selected papers from the 10th International Conference on Cloud Computing and Services Science, CLOSER 2020, held in Prague, Czech Republic, in May 2020. Due to the COVID-19 pandemic the conference was held in a virtual format. The 14 papers presented in this volume were carefully reviewed and selected from a total of 69 submissions. CLOSER 2020 focuses on the emerging area of cloud computing, inspired by some latest advances that concern the infrastructure, operations, and available servicesthrough the global network.

Interpersonal Trust during Childhood and Adolescence Ken J. Rotenberg, 2010-06-24 Since the beginnings of psychology as a discipline, interpersonal trust has been regarded as a crucial aspect of human functioning. Basic levels of interpersonal

trust among people were believed to be necessary for the survival of society and the development of successful psychosocial functioning. Some research has shown that interpersonal trust is linked to physical health, cognitive functioning, and social functioning (including close relationships) across development. This book presents research in the growing field of interpersonal trust during childhood and adolescence (up to the onset of adulthood). It deals with the extent to which children and adolescents demonstrate the multiple facets of trust and trustworthiness, and how these multiple facets affect their social relationships with a wide range of social contacts: parents, peers, and social groups. It will be of interest to developmental, social, educational and clinical psychologists.

Family Assessment: Rationale, Methods and Future Directions Theodore Jacob, Daniel L. Tennenbaum, 2013-11-21
The purpose of this book is to review existing and developing family assessment methods relevant to the study of psychopathology. It is our intention not only to inform clinical researchers of the many valuable family assessment methods that are available, but also to encourage the incorporation of such procedures into future research efforts. In so doing, we believe that our understanding of the etiology, course, treatment, and prevention of adult and childhood disorders will be greatly enriched. The book begins with an overview of the larger social and intellectual forces which have led to the current interest in studying family influences on psychopathology in children and adolescence. For each stream of influence, we attempt to highlight theoretical and methodological contributions relevant to the family's role in the etiology, exacerbation, and treatment of childhood disorders. Next, a framework for classifying family measurement procedures is introduced in which three major dimensions are emphasized: unit of analysis, source of data, and construct assessed. The third and most important chapter provides detailed reviews of a selected number of methods within each of the major groupings that have been delimited, references and brief descriptions of other measures that cannot be reviewed in detail, and a discussion of the promising and developing techniques that are known to the authors.

Basic Methods Handbook for Clinical Orthopaedic Research Volker Musahl, Jón Karlsson, Michael T. Hirschmann, Olufemi R. Ayeni, Robert G. Marx, Jason L. Koh, Norimasa Nakamura, 2019-02-01
This book is designed to meet the needs of both novice and senior researchers in Orthopaedics by providing the essential, clinically relevant knowledge on research methodology that is sometimes overlooked during training. Readers will find a wealth of easy-to-understand information on all relevant aspects, from protocol design, the fundamentals of statistics, and the use of computer-based tools through to the performance of clinical studies with different levels of evidence, multicenter studies, systematic reviews, meta-analyses, and economic health care studies. A key feature is a series of typical case examples that will facilitate use of the volume as a handbook for most common research approaches and study types. Younger researchers will also appreciate the guidance on preparation of abstracts, poster and paper presentations, grant applications, and publications. The authors are internationally renowned orthopaedic surgeons with extensive research experience and the book is published in

collaboration with ISAKOS.

Unfinished Business Terry Bell,Dumisa Buhle Ntsebeza,2003 This book pulls back the curtain on the 'political miracle' of the new South Africa.

Curriculum Evaluation in Schools Robert McCormick,Mary James,2018-10-03 Originally published in 1983 and as a second edition in 1988. An attempt is made in this book to disentangle some of the professional, ethical, political, theoretical and practical issues involved in curriculum evaluation. This book present evidence concerning a number of evaluation strategies and techniques, drawing on experience in several countries, including the UK, Australia and the US, to debate the potential of insider and outsider approaches to evaluation, and combinations of the two. It also offers a practical source book for those wishing to plan and conduct curriculum evaluations. Finally, it considers the crucial question of how evaluation can influence curriculum action and, thereby, teaching and learning.

The Creative Age Gene D. Cohen, MD PhD.,2000-03-07 For thousands of years men and women have risked their lives and spent their fortunes in a futile quest for eternal youth. In this groundbreaking book, world-renowned psychiatrist and researcher Gene D. Cohen takes us to the wellspring of genuine human vitality, the unique creative power generated by age and experience, and shows us how to tap this inner source to enrich, even transform our lives through middle age and beyond. A pioneering physician and respected international authority on aging and creativity, Dr. Cohen weaves history, scientific research, inspiring true-life stories, and his own fresh insights to journey into the previously uncharted territory of human potential in the second half of life. The Creative Age. The over-thirty crowd was once subject to ridicule by younger people, and anyone past age fifty was definitely over the hill. But in a single generation, the view of life after fifty has changed dramatically. Today society is shaped by unprecedented growth in the number of people over fifty, shifting patterns of opportunity and responsibility at work and at home, and advances in healthcare that offer the promise of longer and more active lives. In this fascinating, life-affirming book, Dr. Cohen debunks harmful myths about aging and illuminates the biological and emotional foundations of creative thought and expression. He offers compelling evidence that the unique combination of age, experience, and creativity can produce exciting inner growth and infinite potential for anyone.
