**The Agronomy and Economy of Important Tree Crops of the Developing World** K.P. Prabhakaran Nair, 2010-04-22  
Major tree crops contribute substantially to the economy of many developing countries on the Asian, African and Latin American continents. For example, coffee is the main revenue earner for Kenya. This book provides a comprehensive review of the agronomy, botany, taxonomy, genetics, chemistry, economics, and future global prospects of a range of crops that have great food, industrial and economic value such as cocoa, coffee, cashew, oil palm and natural rubber. - Discusses the major tree crops of great economic value to the developing world - The author is an eminent scientist who has won numerous awards for his work in this area

**Phylogenetic Systematics of Egg-brooding Frogs (Anura: Hemiphractidae) and the Evolution of Direct Development** ,2015 Egg-brooding frogs (Hemiphractidae) are a group of 105 currently recognized Neotropical species, with a remarkable diversity of developmental modes, from direct development to free-living and exotrophic tadpoles. Females carry their eggs on the back and embryos have unique bell-shaped gills. We inferred the evolutionary relationships of these frogs and used the resulting phylogeny to review their taxonomy and test hypotheses on the evolution of developmental modes and bell-shaped gills. Our inferences relied on a total evidence parsimony analysis of DNA sequences of up to 20 mitochondrial and nuclear genes (analyzed under tree-alignment), and 51 phenotypic characters sampled for 83% of currently valid hemiphractid species. Our analyses rendered a well-resolved phylogeny, with both Hemiphractidae (sister of Athesphatanura) and its six recognized genera being monophyletic. We also inferred novel intergeneric relationships [((Cryptobatrachus, Flectonotus), (Stefania, (Fritziana, (Hemiphractus, Gastrotheca)))]], the non-monophyly of all species groups previously proposed within Gastrotheca and Stefania, and the existence of several putative new species within Fritziana and Hemiphractus. Contrary to previous hypotheses, our results support the most recent common ancestor of hemiphractids as a direct-developer. Free-living aquatic tadpoles apparently evolved from direct-developing ancestors three to eight times. Embryos of the sister taxa Cryptobatrachus and Flectonotus share a pair of single gills derived from branchial arch I, while embryos of the clade including the other four genera have two pairs of gills derived from branchial arches I and

II respectively. Furthermore, in *Gastrotheca* the fusion of the two pairs of gills is a putative synapomorphy. We propose a revised taxonomy concordant with our optimal topologies.

*An Intercultural Approach to English Language Teaching* John Corbett, 2003-11-11 Intercultural language education has redefined the modern languages agenda in Europe and North America. Now intercultural learning is also beginning to impact on English Language Teaching. This accessible book introduces teachers of EFL to intercultural language education by describing its history and theoretical principles, and by giving examples of classroom tasks.

**Cultural Awareness** Barry Tomalin, Susan Stempleski, 2013-07-15 This very popular series gives teachers practical advice and guidance, together with resource ideas and materials for the classroom.

Cultural and Heritage Tourism in the Middle East and North Africa Siamak Seyfi, C. Michael Hall, 2020-09-28 This is the first book to provide a comprehensive account of cultural and heritage tourism in the Middle East and North Africa (MENA) region and the many complexities that heritage sites and tourist attractions face. The MENA region has long been regarded as the cradle of Western and Arab civilisation and is the home of many of the world's major religions. Because of this, the region is rich in heritage sites that serve as major tourist attractions and as icons of national, cultural and religious identity. However, as this book examines, heritage in the region is simultaneously highly contested and has even become a target for terrorism creating a situation that brought major challenges for heritage management and sustainable tourism development. Many of the region's innumerable cultural sites are threatened, in some cases by overuse, in others by neglect and, in many, simply by the pressures of economic development. This book is therefore of interest not only to heritage managers and policy makers but those academics who seek to address the delicate balance between tourism development, communities and the tourists who visit such sites in a turbulent but highly significant region of the world.

*Tourism in Iran* Siamak Seyfi, C. Michael Hall, 2018-10-11 Iran has long been regarded as an international pariah state in some parts of the international community. However, its negative image in many countries disguises its history of tourism and rich cultural and natural heritage. Following the July 2015 nuclear deal and the reduction in sanctions, Iran is focusing on international tourism as a means to generate economic growth in addition to its substantial domestic tourism market. Given the significance of tourism in the Middle East and in international politics, as well as restrictions on international mobility, this volume brings together the first contemporary collection of research on tourism in Iran. Written by experts based both within and outside of Iran, the chapters engage with a number of crucial issues including the importance of religion, the role of women in society, sustaining Iran's cultural heritage, Iran's image and the resistive economy to provide a benchmark assessment of tourism and its potential future in a troubled political environment. The book will undoubtedly be of interest not only to those readers who focus specifically on Iran but also those who seek a wider understanding of Iran's role in the region and how tourism is utilised as part of national and regional economic development policies.

**Tourism and Development in the Developing World** David J. Telfer, Richard Sharpley, 2015-12-14 Tourism is widely considered to be an important factor in socio-economic development, particularly in less developed countries. However, despite almost universal recognition of tourism's development potential, the extent to which economic and social progress is linked to the growth of a country's tourism sector remains the subject of intense debate. *Tourism and Development in the Developing World* offers a thorough overview of the tourism-development relationship. Focusing specifically on the less developed world and drawing on contemporary case studies, this updated second edition questions widely-held assumptions on the role of tourism in development and seeks to highlight the challenges faced by destinations seeking to achieve development through tourism. The introductory chapter establishes the foundation for the book, exploring the meaning and objectives of development, reviewing theoretical perspectives on the developmental process, and assessing the reasons why less developed countries are attracted to tourism as a development option. The concept of sustainable development, as the most widely adopted contemporary model of development, is then introduced and its links with tourism critically assessed. Subsequent chapters explore the key issues associated with tourism and development, including the rise of globalization; the tourism planning and development process; the relationship between tourism and communities within which it is developed; the management implications of trends in the demand for and uptake of tourism; and an analysis of the consequences of tourism development for destination environments, economies and societies. A new chapter considers the challenges of climate change, sustainability of resource supply (oil, water and food), global economic instability, political instability and changing demographics. Finally, the issues raised throughout the book are drawn together in a concluding chapter that assesses the tourism and development 'dilemma'. Combining an overview of essential concepts, theories and knowledge with an analysis of contemporary issues and debates in tourism and development, this new edition will be an invaluable resource for those investigating tourism issues in developing countries. The book will be of interest to students of tourism, development, geography and area studies, international relations and politics, and sociology.

*Handbook of Self-Regulation of Learning and Performance* Dale H. Schunk, Barry Zimmerman, 2011-05-15 Self-regulated learning (or self-regulation) refers to the process whereby learners personally activate and sustain cognitions, affects, and behaviours that are systematically oriented toward the attainment of learning goals. This is the first volume to integrate into a single volume all aspects of the field of self-regulation of learning and performance: basic domains, applications to content areas, instructional issues, methodological issues, and individual differences. It draws on research from such diverse areas as cognitive, educational, clinical, social, and organizational psychology. Distinguishing features include: Chapter Structure - To ensure uniformity and coherence across chapters, each chapter author addresses the theoretical ideas underlying their topic, research evidence bearing on these ideas, future research directions, and implications for educational practice. International - Because research on self-regulation is increasingly global, a significant number of international contributors are included

(see table of contents). Readable – In order to make the book accessible to students, chapters have been carefully edited for clarity, conciseness, and organizational consistency. Expertise – All chapters are written by leading researchers from around the world who are highly regarded experts on their particular topics and are active contributors to the field.

Complete Irish Dancer: Optimization of Health and Performance in Irish Dancers Roisin Cahalan, 2020 Irish dancing has emerged as a leading genre among the pantheon of world dance forms. Few traditional art forms have resonated so deeply with the international community, resulting in the establishment of thousands of Irish dancing schools across the globe. Irish dancing is a unique fusion of the athletic and the aesthetic, stylistically distinctive and constantly evolving. At the elite level, it is a hugely competitive activity, placing enormous physical and psychological demands on the dancer, teacher, parent and healthcare professional. The exponential increase in these demands and the relentless calendar of prestigious Irish dancing competitions internationally has resulted in significant levels of injury and underperformance in these dancer athletes. Unlike other more established dance forms such as ballet and contemporary dance, there is a lack of clear information and guidance related to the specific nature and demands of Irish dancing. This book will provide this information and guidance by drawing on best evidence and research-based findings and expertise from leading authorities in the world of dance science and anthropology, sport science, medicine, dietetics and psychology. The book is edited and co-authored by Dr. Róisín Cahalan, who is the world's leading researcher of injury in Irish dancers. Dr. Cahalan is also a chartered physiotherapist with over a decade of experience treating Irish dancers of all levels, the former lead female dancer from Riverdance: The Show and an Irish dancing teacher and adjudicator with An Coimisiún Le Rincí Gaelacha. The book will provide historical context for the growth and development of Irish dancing, insights into the etiology and epidemiology of Irish dance injury, and provide information and advice on appropriate preparation and environmental considerations for healthy Irish dancers. Chapters to enhance physical and psychological resilience and preparedness for the very specific demands of Irish dancing are presented. These include bespoke strength, conditioning and flexibility programs, goal-setting, managing competition anxiety, mental imagery and mindfulness, and sleep optimization. Appropriate training load prescription, tapering and the balance between rest and rehearsal will be explored, as will the most suitable diet to support the Irish dancer. Injury prevention, risk minimization and management are additionally discussed in the book. There is consideration given to the specific needs of certain dancer groups, such as the elite adolescent Irish dancer, the professional touring dancer, and the older dancer. The pivotal role of the parent in impacting the health and performance of the younger dancer is also explored. This book will be an invaluable resource to all those persons involved in the management of Irish dancers including teachers, parents, choreographers, dance company managers, strength and conditioning personnel, clinical professionals and dancers themselves. It will provide scientifically robust, but practical and applicable advice and information to ensure longevity, peak-

performance and holistic wellbeing in Irish dancers.

Early Start Denver Model for Young Children with Autism Sally J. Rogers, Geraldine Dawson, 2010-01-01 Supported by the principles of developmental psychology and applied behavior analysis, ESDM's intensive teaching interventions are delivered within play-based, relationship-focused routines. The manual provides structured, hands-on strategies for working with very young children in individual and group settings to promote development in such key domains as imitation; communication; social, cognitive, and motor skills; adaptive behavior; and play. --from publisher description

*Radical Constructivism in Mathematics Education* E. Glasersfeld, 2006-04-11 Mathematics is the science of acts without things - and through this, of things one can define by acts. 1 Paul Valéry The essays collected in this volume form a mosaic of theory, research, and practice directed at the task of spreading mathematical knowledge. They address questions raised by the recurrent observation that, all too frequently, the present ways and means of teaching mathematics generate in the student a lasting aversion against numbers, rather than an understanding of the useful and sometimes enchanting things one can do with them. Parents, teachers, and researchers in the field of education are well aware of this dismal situation, but their views about what causes the wide-spread failure and what steps should be taken to correct it have so far not come anywhere near a practicable consensus. The authors of the chapters in this book have all had extensive experience in teaching as well as in educational research. They approach the problems they have isolated from their own individual perspectives. Yet, they share both an overall goal and a specific fundamental conviction that characterized the efforts about which they write here. The common goal is to find a better way to teach mathematics. The common conviction is that knowledge cannot simply be transferred ready-made from parent to child or from teacher to student but has to be actively built up by each learner in his or her own mind.

Floods of Fortune Michael Goulding, Nigel J. H. Smith, Dennis J. Mahar, 1996 Enriched with nearly 100 beautiful color photographs, *Floods of Fortune* offers the first holistic view of the conservation drama unfolding in the Amazonian floodplain.

*Team Performance in Health Care* Gloria D. Heinemann, Antonette M. Zeiss, 2012-09-18 This volume presents the work of clinical health care teams and natural work groups, quality improvement teams, committees, and task forces made up of employees in health care settings. It discusses proven multidimensional instruments that measure team performance along with future needs for measuring team performance. It will be a resource for medical instructors and students, public health workers, and health administrators interested in team management.

**Consumer-Brand Relationships** Susan Fournier, Michael Breazeale, Marc Fetscherin, 2012-03-29 The creation and management of customer relationships is fundamental to the practice of marketing. Marketers have long maintained a keen interest in relationships: what they are, why they are formed, what effects they have on consumers and the marketplace, how

they can be measured and when and how they evolve and decline. While marketing research has a long tradition in the study of business relationships between manufacturers and suppliers and buyers and sellers, attention in the past decade has expanded to the relationships that form between consumers and their brands (such as products, stores, celebrities, companies or countries). The aim of this book is to advance knowledge about consumer-brand relationships by disseminating new research that pushes beyond theory, to applications and practical implications of brand relationships that businesses can apply to their own marketing strategies. With contributions from an impressive array of scholars from around the world, this volume will provide students and researchers with a useful launch pad for further research in this blossoming area.

**Diseases of Tropical Fruit Crops** Randy C. Ploetz, 2003 Globally, tropical fruit production is increasing as demand increases in Northern temperate markets. This book offers a comprehensive review of diseases of important tropical and subtropical fruit crops. The history, distribution, importance, etiology, epidemiology and control of diseases of each host crop are covered, along with brief summaries on the taxonomy, origins and characteristics of each host. Additional information is given on the biology and pathology of the causal agents and on new advances that change or otherwise enhance our understanding of the nature and cause of these diseases.
