Groundwater Development and Management Pradip K. Sikdar, 2018-07-27 This book deals with the challenges for efficient groundwater management, with a focus on South Asia and India, providing a balanced presentation of theory and field practice using a multidisciplinary approach. Groundwater of South Asia is increasingly confronted with overuse and deteriorating quality and therefore requires urgent attention. Management of the stressed groundwater systems is an extremely complex proposition because of the intricate hydrogeological set-up of the region. Strategies for sustainable management must involve a combination of supply-side and demand-side measures depending on the regional setting and socio-economic situations. As a consequence, the challenges of efficient groundwater management require not only a clear understanding of the aquifer configuration, but also demand for the development of a comprehensive database of the groundwater occurrences and flow systems in each hydrogeological setting. In addition, drilling and well construction methods that are appropriate to different hydrogeological formations need to be implemented as well as real-time monitoring of the status of the groundwater use. Also corrective measures for groundwater that is threatened with depletion and quality deterioration need to be installed. Finally, the legal framework of groundwater needs to be rearticulated according to the common property aspect of groundwater. These challenges should revolve around effective groundwater governance by creating an atmosphere to support and empower community-based systems of decision-making and revisit the existing legal framework and groundwater management institutions by fostering community initiatives. This book is relevant for

academics, professionals, administrators, policy makers, and economists concerned with various aspects of groundwater science and management.

Shakespeare's Theory of Drama Pauline Kiernan, 1998-07-23 Why did Shakespeare write drama? Did he have specific reasons for his choice of this art form? Did he have clearly defined aesthetic aims in what he wanted drama to do - and why? Pauline Kiernan opens up a new area of debate for Shakespearean criticism in showing that a radical, complex defence of drama which challenged the Renaissance orthodox view of poetry, history and art can be traced in Shakespeare's plays and poems. This study, first published in 1996, examines different stages in the canon to show that far from being restricted by the 'limitations' of drama, Shakespeare consciously exploits its capacity to accommodate temporality and change, and its reliance on the physical presence of the actor. This lively, readable book offers an original and scholarly insight into what Shakespeare wanted his drama to do and why.

Parasitic Protozoa of Farm Animals and Pets Monica Florin-Christensen, Leonhard Schnittger, 2018-04-17 This book provides an in-depth yet concise overview of the most common and emerging protozoa that cause diseases in both farm animals and companion animals. As outlined in the concise introduction, pathogenic protozoans represent an evolutionary highly diverse and little understood group of disease-causing microorganisms. For each of the featured parasitic unicellular eukaryotes, it discusses the morphology, lifecycle, epidemiology and host-pathogen interactions. In addition, the book highlights the latest developments in diagnostic methods, as well as prevention and treatment strategies. Thorough information on genomes and genetic manipulation strategies for some of the protozoa covered in this book is also included. Infections involving parasitic protozoa can cause productivity losses and/or reduce the quality of life of infected animals. Some infections are zoonotic, posing an on-going public health threat. In most cases, prevention and treatment are either non-existent or need considerable improvement. On the other hand, a great deal of research has recently been conducted on these organisms, yielding valuable new information on their global distribution and revealing the mechanisms of host-pathogen interactions at the molecular level - and essential insights that can be used for the development of new control tools. This book includes extensive information on both basic aspects and recent scientific discoveries on these protozoa and

thus constitutes a unique resource for students, veterinarians, and researchers alike.

Media Spectacle Douglas Kellner, 2003-08-29 During the mid-1990s, the O.J. Simpson murder trial dominated the media in the United States and were circulated throughout the world via global communications networks. The case became a spectacle of race, gender, class and violence, bringing in elements of domestic melodrama, crime drama and legal drama. According to this fascinating new book, the Simpson case was just one example of what the author calls 'media spectacle' - a form of media culture that puts contemporary dreams, nightmares, fantasies and values on display. Through the analysis of several such media spectacles - including Elvis, The X Files, Michael Jordan, and the Bill Clinton sex scandals - Doug Kellner draws out important insights into media, journalism, the public sphere and politics in an era of new technologies. In this excellent follow up to his best selling Media Culture, Kellner's fascinating new volume delivers an informative read for students of sociology, culture and media.

Wetland Techniques James T. Anderson, Craig A. Davis, 2013-10-10 Wetlands serve many important functions and provide numerous ecological services such as clean water, wildlife habitat, nutrient reduction, and flood control. Wetland science is a relatively young discipline but is a rapidly growing field due to an enhanced understanding of the importance of wetlands and the numerous laws and policies that have been developed to protect these areas. This growth is demonstrated by the creation and growth of the Society of Wetland Scientists which was formed in 1980 and now has a membership of 3,500 people. It is also illustrated by the existence of 2 journals (Wetlands and Wetlands Ecology and Management) devoted entirely to wetlands. To date there has been no practical, comprehensive techniques book centered on wetlands, and written for wetland researchers, students, and managers. This techniques book aims to fill that gap. It is designed to provide an overview of the various methods that have been used or developed by researchers and practitioners to study, monitor, manage, or create wetlands. Including many methods usually found only in the peer-reviewed or gray literature, this 3-volume set fills a major niche for all professionals dealing with wetlands.

Open Tourism Roman Egger, Igor Gula, Dominik Walcher, 2016-03-02 This book examines the concepts of open innovation, crowdsourcing and co-creation from a holistic point of view and analyzes them considering their suitability to the tourism industry. Methods, theories and models are discussed and examined regarding their practical applicability in tourism. The book illustrates the theoretical mechanisms and principles of Open Innovation, Crowdsourcing and Co-creation with case studies and best practices examples. In addition to the scientific target group, the book is a useful resource for managers of the entire tourism industry. First, the book presents the theoretical fundamentals and concepts in 11 specific chapters. This basis is then enriched by three parts with case studies, focusing on information, creation and provision respectively. Finally in a concluding part the editors sum up the book and give an outlook on the implications, learnings and future perspectives of open innovation, crowdsourcing and collaborative consumption in the tourism industry.

Women, Entrepreneurship and Development in the Middle East Beverly Dawn Metcalfe, Bettina Lynda

Bastian, Haya Al-Dajani, 2021-12-20 The Middle East was the region least impacted in the 2008 crisis, has investment systems markedly different to the West, is largely governed by Islamic Shari'a, and has varying forms of governance and institutional organization, which are not understood by many, nor how these systems shape entrepreneurial and industrial development. While the Middle East as a region has seen a small growth in entrepreneurship for women, and business scholarship on the Middle East has grown, there is no text in English that has brought critical insights from the Middle East together in a single volume. In examining women's entrepreneurship in the Middle East, this book aims to challenge Global North assumptions about the disempowering impacts of Islamic Shari'a and governance. Referring to the constraints of Islam on women's subjectivity and agency greatly misunderstands religious identity, of both men and women, and the way in which public administration and private sector institutions are organized in very different ways to Western regions. This timely text expands and adds new insights to the theorizations of women's entrepreneurship in the Middle East, through unravelling spatialized themes, and incorporates contemporary themes including: an Islamic science reading of women, work and venturing; changing families and entrepreneurship development; women managing social crises; Islamization, governance and women; Islamic feminist activism and entrepreneurship; representations of women's entrepreneurship on social media; and women's collectives leading entrepreneurship via Facebook entrepreneurship. It will be of interest to researchers, academics, and students in the fields of entrepreneurship, gender, work and organizations.

Love and Loss Colin Murray Parkes, 2013-05-13 Loving and grieving are two sides of the same coin: we cannot have one without risking the other. Only by understanding the nature and pattern of loving can we begin to understand the problems of grieving. Conversely, the loss of a loved person can teach us much about the nature of love. Love and Loss, the result of a lifetime's work, has important implications for the study of attachment and bereavement. In this volume, Colin Murray Parkes reports his innovative research that enables us to bring together knowledge of childhood attachments and problems of bereavement, resulting in a new way of thinking about love, bereavement and other losses. Areas covered include: patterns of attachment and grief loss of a parent, child or spouse in adult life social isolation and support. The book concludes by looking at disorders of attachment and considering bereavement in terms of its implications on love, loss, and change in a wider context. Illuminating the structure and focus of thinking about love and loss, this book sheds light on a wide range of psychological issues. It will be essential reading for professionals working with bereavement, as well as graduate students of psychology, psychiatry, and sociology.

DNA Barcoding and Molecular Phylogeny Subrata Trivedi, Hasibur Rehman, Shalini Saggu, Chellasamy

Panneerselvam, Sankar K. Ghosh, 2020-08-24 This book presents a comprehensive overview of DNA barcoding and molecular phylogeny, along with a number of case studies. It discusses a number of areas where DNA barcoding can be applied, such as

clinical microbiology, especially in relation to infection management; DNA database management; and plant -animal interactions, and also presents valuable information on the DNA barcoding and molecular phylogeny of microbes, algae, elasmobranchs, fishes, birds and ruminant mammals. Furthermore it features unique case studies describing DNA barcoding of reptiles dwelling in Saudi Arabian deserts, genetic variation studies in both wild and hatchery populations of *Anabas testudineus*, DNA barcoding and molecular phylogeny of Ichthyoplankton and juvenile fishes of Kuantan River in Malaysia, and barcoding and molecular phylogenetic analysis of indigenous bacteria from fishes dwelling in a tropical tidal river. Moreover, since prompt identification and management of invasive species is vital to prevent economic and ecological loss, the book includes a chapter on DNA barcoding of invasive species. Given its scope, this book will appeal not only to researchers, teachers and students around the globe, but also to general readers.

Fundamentals of mold growth in indoor environments and strategies for healthy living Olaf C.G. Adan, Robert A. Samson, 2011-09-18 Today, indoor mold and moisture, and their associated health effects, are a society-wide problem. The economic consequences of indoor mold and moisture are enormous. Their global dimension has been emphasized in several recent international publications, stressing that the most important means for avoiding adverse health effects is the prevention (or minimization) of persistent dampness and microbial growth on interior surfaces and in building structures. This book aims to describe the fundamentals of indoor mold growth as a prerequisite to tackle mold growth in the existing building stock as well as in future energy efficient buildings. It brings together different disciplinary points of view on indoor mold, ranging from physics and material science to microbiology and health sciences. The contents have been outlined according to three main issues: Fundamentals, particularly addressing the crucial roles of water and materials, Health, including a state-of-the-art description of the health-related effects of indoor molds, and Strategies, integrating remediation, prevention and policies.

Safety Planning with Battered Women Jill M. Davies, Eleanor Lyon, Diane Monti-Catania, 1998 Safety Planning with Battered Women introduces a new model of òwoman-definedö advocacy that is designed to bridge the gap that sometimes occurs between a battered womanÆs perspective and a victim advocateÆs perception. Created to improve service delivery to women who are victims of domestic violence, this new model emphasizes placing attention on the victimÆs assessment of the risk in a violent relationship and in her decision making. Authors Jill Davies, Eleanor Lyon, and Diane Monti-Catania strive to help advocates better understand battered womenÆs decisions, including the decision to remain in an abusive relationship; to improve advocacy for victims with varying cultural backgrounds and experiences; and to provide advocates with assistance in redesigning their services, so they may better meet the needs of battered women. Since there are no quick fixes to the problems encountered in cases of domestic violence, it is vital that victims be provided with a real understanding of their options and the opportunity to implement those safety plans they deem most feasible. Safety Planning with Battered Women

helps advocates tailor alternatives that will enhance the safety of battered women based on the individual realities of battered women. This book is both enlightening and highly practical and is a must read for anyone working with domestic violence victims. By introducing a woman-defined model and offering a new approach to advocacy, *Safety Planning with Battered Women* will compel readers to reexamine current approaches and examine the future provision of services to domestic violence victims, making it a valuable resource for students, researchers, academics, professionals, and practitioners.
